# Club Lockers Solutions

## Materials and Design Features

### Housings, shelves and fixtures

- MFC (melamine faced chip-board) to BS5669, 15mm thick
- front edges capped with PVC edging tape, 3mm thickness with other exposed edges protected by melamine edging tape
- units supplied fully assembled, using metal cam and dowel fixings and beech dowels
- ventilation holes to all shelves
- locker units stand on adjustable legs 100mm high, with a matching continuous plinth

### Locker Doors

- MFC, 18mm thickness, edged all round in durable 3mm PVC tape
- timber – solid timber frames 20mm thick, with raised and fielded veneered centre panels
- door hinges allow 170° opening, with all-steel boss and mounting plates, tested to strength requirement BS6222 (1992)

### Locker dimensions

- Sizes are matched to storage and space requirements with nominal standard dimensions (mm) of: 1800h x 400w x 500d

### Finishes

- timber doors are available in oak, cherry, ash, birch, maple
- a wide range of MFC timber effect melamine finishes and colours are available, ranging from light to dark woods, in various hues and colour density

## The Club range of lockers and changing room furniture features:

- secure personal storage locker units, with a choice of door and compartment configurations
- integral seating units, shelf units and shoe racks
- design features including mounts for vanity mirrors
- clothes hanging units, as wall mounted or 'island' fixtures
- vanity screens
