

Smoking at work

- are you ready for the new laws?

By 1st July 2007, every business in England and Wales will be affected by new legislation. This legislation governs smoking in the workplace and will outlaw smoking in enclosed spaces such as offices, factories, colleges, workshops, laboratories, canteens, warehouses, and designated smoking rooms.

Why install a Smoking Shelter?

- **Keeps the Law** - by 1st July 2007, it will be illegal to smoke inside a building at work
- **Promotes staff well-being** - a smoking shelter provides protection from the wind and rain
- **Creates a designated smoking zone** - this can be sited in a discrete corner of the site away from building entrances
- **Helps control litter** - optional extras for smoking shelters include ash trays

Why choose a QMP Smoking Shelter?

- **Exempt from the law** - Smoking in a QMP Smoking Shelter is permitted as they are greater than 50% open and are therefore exempt from the new laws
- **Wide choice of size** - QMP Smoking Shelters come in a wide variety of shapes and sizes to suit all establishments both large and small
- **Great weather protection** - QMP free-standing Smoking Shelters have panels on all 4 sides to give excellent weather protection
- **Installation service available** - not only can we supply and deliver your shelter, we can erect it as well. Please call for a competitive quote

Traditional Smoking Shelters

In the summer of 2007, legislation and a new code of practice will result in a total ban on smoking in the workplace throughout the whole of the UK.

These shelters enable employers and establishments to create a designated smoking area away from main entrances and exits.

- Robust all-weather construction
- Clear perspex sides with choice of perforated sheet steel or perspex back
- Adjustable feet for on-site positioning
- More than 50% open area to allow rapid dispersal of cigarette fumes
- Smaller shelters suitable for up to 9 people, larger shelters up to 12 people
- Parabolts for surface mounting included. Must be bolted to 250mm thick concrete for stability
- Site survey and erection service available
- For coastal locations we recommend shelters made from pre-galvanised powder coated steel for added protection against corrosion. Please contact sales for prices
